#### **APPLICATION**

TubeTrace, with "cut-to-length" HTSX self-regulating heat tracing, is designed to provide freeze protection or temperature maintenance from 40°F (5°C) to 302°F (150°C) for tubing where high temperature exposure capability is possible. HTSX withstands temperature exposures of 482°F (250°C).

Self-regulating HTSX heat tracing:

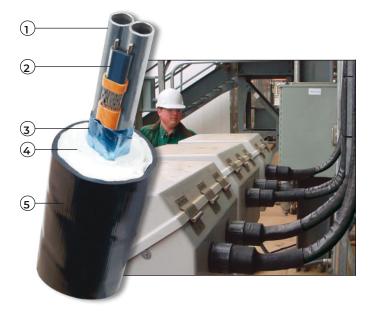

- · Varies in response to the surrounding conditions along the entire length of a circuit.
- · Lower risk of overheating the tube or product.
- Installed cost is lower because "cut-to-length" HTSX makes end connections easy with minimal waste
- HTSX is approved for use in ordinary (nonclassified) areas and hazardous (classified) areas.

HTSX	Ratings					
Available watt densities	10, 20, 30, 39, 49, 66 W/m @ 10°C (3, 6, 9, 12, 15, 20 W/ft @ 50°F)					
Supply voltages	110-120 or 208-277 Vac					
Tube temperature range	5°C to 150°C (40°F to 302°F)					
Max. exposure temperature <sup>1</sup> Intermittent power-on or off Continuous power-off	250°C (482°F) 205°C (400°F)					
T-rating 3,6,9,12, 15-2 W/ft 15-1 and 20-1 W/ft 20-2 W/ft	T3: 200°C (392°F) T2D: 215°C (419°F) T2C: 230°C (446°F)					

# Note

1. This reflects maximum exposure for heater. If bundle jacket is to remain below 60°C (140°F) in 27°C (80°F) ambient (in consideration of personnel burn risk) tube temperature must remain below 205°C (400°F). Alternative designs to keep jacket below 60°C (140°F) in higher ambients and/or with higher tube temperatures are available. Contact TC-E.

#### CONSTRUCTION

- 1 Process tube(s)
- 2 HTSX self-regulating electrical heat tracing
- 3 Heat reflective tape
- 4 Non-hygroscopic glass fiber insulation
- 5 Polymer outer jacket (ATP or TPU available)

## **PRODUCT FEATURES**

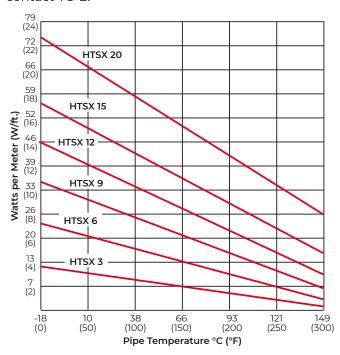

- Self-regulating
- · "Cut-to-length"
- · Hazardous area approvals

For additional information on HTSX and other Thermon heat tracing products and services, visit www.tc-e.nl.

#### **POWER OUTPUT CURVES**

The power outputs shown apply to cable installed on insulated metallic pipe (using the procedures outlined in IEEE Standard 515) at the service voltages stated below. For use on other service voltages, contact TC-E.

#### **DESIGN TOOLS**

Technical Design Information and CompuTrace® -IT computer design program for TubeTrace heated instrument tubing are available online at www. thermon.com.

## **TUBETRACE ACCESSORIES**

Sealing the ends of pre-insulated tubing bundles ensures their efficient and reliable performance. A variety of termination kits and accessories are available and can be found on Form CLX0020.

#### **ELECTRICAL HEAT TRACE ACCESSORIES**

Thermon manufactures every type of electrical resistance heat tracing available in the world today. Power connection and termination kits (Form CLX0024) and a variety of controls are all available for heated instrument tubing applications.

materials are available.

# **HOW TO SPECIFY**

Bundle Type ————————————————————————————————————	Process —				Bundle	Process Tube(s) Wall Thickness		
ME = Multiple Tubes	Tube O.D.	Process Tube Material —		☐Heat Trace Option	Jacket	030 = .030"
