IAK8EK

Connection kit for single core heating cables for use in hazardous area.

- Temperature resistant up to 190°C
- Current rating of 20A
- For single core cables ISK, CSK etc.
- Brass nickel plated, thus very solid
- Stainless steel version upon request
- Compact design

Description

The IAK8EK system is a very easy and fast to install connection kit for connecting cold lead and heating cable or for reparation of heating cables based on a screw connection.

Because of the very compact design the set can be placed between surface and insulation.

There is no blow-heater or special skills required for assembling.
